

INSPECTION COURSES

BASIC VISUAL INSPECTION

This course will prepare candidates to enter or re-enter the world of Turnaround Inspection. Covers tips for maneuvering within the turnaround atmosphere, organizational and administrative tricks to allow the inspector to spend more time Inspecting and introduces the student to the visual inspection of heaters, heat exchangers, towers and drums; along with the importance of obtaining quality inspection tools, where to purchase them and proper techniques for using those tools. The final four hours is designed to hone basic report writing skills.

Chris Marler's inspection manuals "*The Heat Exchanger Book*" and "*The Tower Book*" and advance copies of "*The Heater Book*" will be available to students at a 10% discount during the week of the class. These books provide valuable insight into how the equipment operates, proper equipment terminology to facilitate inspection and failure modes; to our knowledge are the only "How to inspect it/What to look for/Where to look and What it's called" books ever written by and for Inspectors.
